Market Scan Information Systems, Inc. commissions local artist to paint mural in corporate headquarters

Market Scan Information Systems, Inc. commissioned local Southern California Artist, Brittany West, to paint a 9' X 13' mural in the company's new corporate headquarters.

Market Scan President and Co-Founder, Rusty West, stated "We had one wall in our new offices that we weren't quite sure how to decorate so we decided to do something fun and exciting for our team. After discussing several options with the artist we settled on a mural celebrating our Championship Grand-Am/Rolex Series season. Every Time I walk by it I can't believe how well it turned out."

Steve Smythe, Market Scan's C.E.O., said "It was really fun and interesting seeing this project come together. The painting took nearly 10 days to complete – seeing it unfold day by day was fascinating. I could not be happier with the result"
